The Detoxification Enzyme Systems prepares the body for efficient weight loss while eliminating harmful toxins from the system.

- Reduces water retention and increases energy level
- Helps clear up acne prone skin

The human body is exposed to a wide array of xenobiotics in one's lifetime, from food components to environmental toxins to pharmaceuticals, and has developed complex enzymatic mechanisms to detoxify these substances. These mechanisms exhibit significant individual variability, and are affected by environment, lifestyle, and genetic influences.

The scientific literature suggests an association between impaired detoxification and certain diseases, including cancer, Parkinson's disease, fibromyalgia, and chronic fatigue/immune dysfunction syndrome.

Data regarding these hepatic detoxification enzyme systems and the body's mechanisms of regulating them suggest the ability to efficiently detoxify and remove xenobiotics.

Xenobiotics: chemicals / pollutants, such as dioxins - artificial substances added to foods, growth hormones, antibiotics, smoking, alcohol.

We are exposed to a great number of xenobiotics during the course of a lifetime.

Our bodies have evolved complex systems of detoxification enzymes.

These enzymes usually function adequately to minimize the potential of damage from xenobiotics.

Therefore, accumulated data supports and individual's ability to remove toxins from the body may play a major role in etiology or exacerbation of a range of chronic conditions and diseases.

We lead busy lives today, and a lot of the time our body pays a high price; since so many people make poor food choices, including fast foods, foods high in saturated fats, and meats that have hormones and antibiotics and are also high in saturated fats.

GliSODIN Detox Formula contains (key ingredient) Super Oxide Dismutase – this is an enzyme in modulating cellular toxicity by increasing your levels of superoxide dismutas (SOD). SOD is a powerful antioxidant that is already produced in your systems, but it significantly decreases as you age. By boosting your SOD levels, especially while detoxing, increases your vitality, while also nourishing and protecting your skin from damage and the effects of aging.

The natural (intrinsic) aging of the skin is enhanced by environmental factors (extrinsic aging). One of the most significant environmental factors is solar UV exposure, which results in photo-aging antioxidants such as (SOD). This enzyme is intimately involved in the prevention of cellular damage – the common pathway for cancer, aging and a variety of diseases.

Free Radicals: Atoms or groups of atoms with an odd (impaired) number of electrons and can be formed when oxygen interacts with certain molecules.

Once formed, these highly reactive radicals can start a chain reaction, like dominoes. Their chief danger comes from the damage they can do when they react with important cellular components such as DNA, or cell membrane. Cells may function poorly or die if this occurs.

This product was specially formulated to promote detoxification through the liver, kidneys, intestinal tract, and skin to promote optimum health.

Many studies have shown that poor health and oxidative stress can lead to blemished, discoloured and dull skin, as well as premature aging.

Berries and Chardonnay grapes provide a full spectrum of nutritious antioxidants for optimal health and radiant skin; Alpha Lipoic Acid Chelates heavy metals and neutralizes several types of free radicals; milk thistle contains a mixture of flavanoid complexes that protects and promotes liver cleansing. (Chelation Therapy has been in for over 60 years and has been proven to eliminate heavy metals, lead mercury, iron, etc. from the body. The issue with heavy metals is that they accumulate causing many health problems that can literally affect every major organ.)

NutraFlora prebiotic fiber is a simple way to deliver the advantage of soluble fiber. NutraFlora is an excellent source of soluble fiber to aid in digestion and elimination, which assists in weight loss; broccoli is high in sufforaphane, which induces detoxification enzymes for enhanced cleansing. Related health benefits included improved calcium absorption and strengthened digestive and immune systems

RISK INFORMATION

DO NOT take one week prior to surgery and one week after surgery. Dandelion can have a blood thinning effect.

Consult with your doctor if you are pregnant or breastfeeding. Please list any medications.

(Should I put lines here for the medication list?)

- Blood clotting disorder: Dandelion – blood thinning
- Diabetes: Alpha Lipoic Acid can affect blood sugar levels; so the advanced detoxification formula is no recommended for diabetic clients.
- Liver disease: Milk thistle cleans the liver, so if a patient/client has a liver disorder, the advanced detoxification formula is not recommended.
- Allergens: Contains gluten from wheat protein and milk thistle, which is part of the Aster (compositive/asteracea) family.

DETOX PROGRAM

LOMBARDI PLASTIC SURGEY CENTER
Anthony Lombardi, M.D., F.A.C.S.
Laurie Lombardi, C.N.
32 Corbett Way
Eatontown, NJ 07724

(732) 460-9555

<http://www.doctorsofcosmeticsurgery.com>

(ALL INCLUSIVE)

Consult / Diet Planning

- Initial consult
 - o 50 minutes
 - 2 weeks supply of detox packets
 - 2 times per day
- 2 weeks second follow up visit
 - o 40 minutes

TOTAL = \$450.00

(ALL INCLUSIVE)

- Initial consult
 - o 50 minutes
 - 2 weeks supply of detox packets
 - 1 month supply advanced slimming formula
- 2 weeks second follow up visit
 - o 40 minutes
 - 1 month supply slimming drink
(diet continues)
- 30 days after slimming drink follow up visit
 - o 40 minutes
 - Discuss with patient

- TOTAL = \$600.00

GliSODin Skin Nutrients

TWO WEEK DETOX PROGRAM

*“Get The GliSODin Glow”
“Beauty From The Inside Out”*
